GUJJARLAPUDI AKHIL BABU

+91 7780139262 | akhilbabu7710@gmail.com | github.com/akhil05-g | linkedin.com/in/akhil-gujjarlapudi | Portfolio | LeetCode

Profile Summary

CS undergraduate Who Understands and has solid expertise in Data Structures, Algorithms, and Software Engineering and is experienced in owning and maintaining complete features from end to end. Designed, developed and deployed production applications using React, Node JS and MySQL, creating modular, scalable, and efficient service layers focusing on maintainability and performance. Active competitive programmer, problems solved on LeetCode (Arrays, Hashing, Two-Pointers, Sliding Window), and a published researcher in agentic AI (2026). Experienced in translating fuzzy requirements to clean, scalable, and maintainable software solutions.

Education

S.R.M University, Mangalagiri **Aug 2023 – Aug 2027**
B.Tech in Computer Science and Engineering — CGPA: 8.0/10.0 *Andhra Pradesh, India*
- Coursework: Data Structures & Algorithms, OOP with Java, DBMS, Operating Systems, Generative AI, ERP Solutions

NRI Junior College, Tenali — 90% **Jun 2021 – Apr 2023**
Guntur, Andhra Pradesh

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C++
Full Stack: React.js, Node.js, REST APIs, Tailwind CSS, HTML/CSS, MVC Architecture
Databases: MySQL, MongoDB, PostgreSQL, SQL Server, ACID Compliance
Tools & Practices: Git, GitHub, JWT Auth, Salesforce CRM, SOLID Principles, Agile SDLC
DSA: LeetCode problems — Arrays, Hashing, Two-Pointer, Sliding Window — LeetCode Knight Badge

Research Publication

MARLF: Memory-Augmented Multi-Agent RL with LLM Feedback **Mar – Apr 2026**
Conference Proceeding | Python, MAPPO, PettingZoo, LLM | *doi.org/10.5281/zenodo.19998804*
- Co-authored a published framework augmenting multi-agent PPO with semantic episodic memory and LLM-guided reward shaping.
- Achieved 59.9%–65.4% improvement over baselines across 3 MPE benchmarks (Cohen's $d > 7.0$), validating agentic coordination gains.

Internships

Artificial Intelligence Intern **Jun – Aug 2025**
Infosys Springboard
- Built end-to-end ML pipelines for classification and regression using Python and scikit-learn; improved accuracy through feature engineering, hyperparameter tuning, and modular evaluation pipelines.
- Communicated model performance comparisons and technical findings to non-technical stakeholders through structured reports.

Salesforce CRM Intern **Jun – Aug 2025**
SmartBridge
- Designed and automated 5+ enterprise workflows using Salesforce CRM; applied object modeling, validation rules, and flow automation to enforce data integrity across process pipelines.
- Translated functional requirements into component-level specifications — mirroring the requirement-to-implementation development cycle.

Projects

Vyuha — Full-Stack Sports Management Platform | *React.js, Node.js, MySQL, JWT, REST API*
- Designed a modular MVC architecture separating data, business logic, and presentation layers to support independent horizontal scaling of API and dashboard services.
- Optimized MySQL schema for multi-entity CRUD at scale; decoupled data, business logic, and UI layers for independent scaling.

E-Commerce Database Management System | *Java, MySQL, JDBC, SQL Server*
- Designed a production-grade relational schema with 15+ normalized tables enforcing ACID compliance, foreign key constraints, and indexing for full order lifecycle tracking and revenue reporting.
- Used JDBC with parameterized queries for all CRUD operations, eliminating SQL injection risk and ensuring data consistency under concurrent transactions.

SUMMAI — AI-Powered Business Article Summarizer | *Python, NLP, BART, TextRank, REST API*
- Built a dual-mode NLP pipeline (TextRank extractive + BART abstractive) to solve information overload; evaluated on 300K+ CNN/DailyMail articles using ROUGE metrics.
- Exposed summarization as a REST API endpoint, demonstrating modular pipeline architecture and web service design.

Certifications

Oracle Certified Professional: Java SE 17 Developer *Oracle*
Solving Business Problems using Generative AI Hub *SAP S/4 HANA*
Artificial Intelligence Internship Certification *Infosys Springboard*
Introduction to Cybersecurity *Cisco Networking Academy*

Interests

Distributed Systems, System Design, Algorithm Design, Competitive Programming, Open Source Contribution, Badminton
